Would You Trust a Restaurant Without Inspections?

Don't Trust Products Without FM Approvals.

FM Approvals: The Health Inspector for Industrial Safety. Trust it to ensure products are rigorously tested and consistently reliable.

Think of FM Approvals like a health inspector for restaurants. Just as you wouldn't trust a restaurant that skips health inspections, you shouldn't trust industrial products that haven't been rigorously tested and audited. FM Approvals is the only third-party certification in the industry that audits manufacturing facilities, tests products for safety, and ensures they consistently meet the highest standards.

Product Testing

FM Approvals ensures that what you're buying isn't just a claim—it's been proven through real testing.

Workplace Safety

Products with FM Approvals reduce the risk of accidents caused by unreliable materials.

Compliance

Many industries require certified products to meet strict regulations. Using FM Approved products ensures compliance with those standards.

Peace of Mind

It guarantees that manufacturers aren't cutting corners—because they're regularly audited and held accountable.

Would You Trust a Restaurant Without Inspections?

Don't Trust Products Without FM Approvals.

Manufacturing Begins

Raw materials are selected and manufacturing starts

FM Initial Audit

FM Approvals conducts an audit to ensure compliance with safety and quality standards.

Product Testing

Products undergo rigorous testing for fire resistance, durability, and performance.

FM Certification Granted

Once testing is passed, the product receives FM certification.

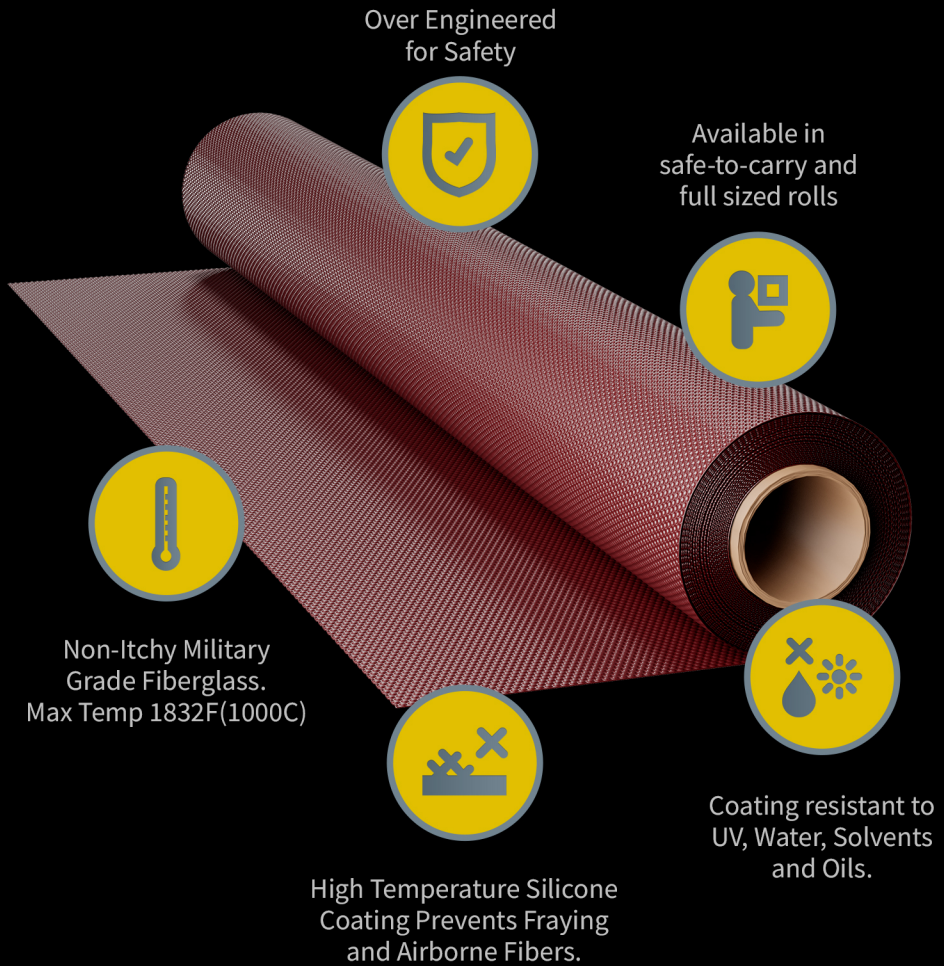

Biannual Audits

FM performs audits twice a year, sometimes unannounced, to verify ongoing compliance.

Random Retesting

FM randomly retests products from the market to ensure consistency and safety.

ANSI FM 4950
Blanket
Approved

ASTM F1358
Fire Resistant
Level 4

No
Harmful
Off-Gas

Available in
safe-to-carry and
full sized rolls

Over Engineered
for Safety

Non-Itchy Military
Grade Fiberglass.
Max Temp 1472F(800C)

Coating resistant to
UV, Water, Solvents
and Oils.

High Temperature Silicone
Coating Prevents Fraying
and Airborne Fibers.

ANSI FM 4950
CURTAIN
approved

ASTM F1358
Fire Resistant
Level 4

No
Harmful
Off-Gas

Alpha Welding Cushions

2"(5cm) of Bio-Soluble,
Mildew Resistant Insulation
good to 4172F(2300C)

Double Stitched
with High Temperature
Kevlar Thread

Large Carry Handle
Fits a Gloved Hand.

2X1
2X2
2X4

Available in
2x1, 2x2, 2x4

Heavy Duty Alpha
Material Cover

High Silica

Handles temperatures up to 1832°F (1000°C).

Tough enough for industrial use, easy to handle.

Ideal for welding, insulation, and industrial heat shields.

Blue Diamond Flooring

Flame Resistant
NFPA 701 Approved

Diamond Plate Textured Finish for Maximum Anti Slip Traction

Puncture Resistant Material

Stays Pliable in Subzero Temperatures

Available in 2 Safe-To-Lift Sizes

Anti-Static Material

WORK SAFE TODAY ENJOY LIFE TOMORROW

Safety at work isn't just about meeting standards—it's about making sure you get back to what matters most: your family, friends, and the moments that make life meaningful.

Fishing with a view

Family bike rides.

*Exploring the
great outdoors.*

*Barbecues
and
laughter.*

*Quiet
Moments
by the
Water.*
