

BIO SOLUBLE WOOL BULK

SFBW-1200

1200°C max

AES Wool

Short Fiber

Biomag™ soluble wool bulk is made from alkaline earth silicate wool (AES) with low bio persistence, it's the basis of bio soluble fiber products family, It features low thermal conductivity, soft –long fiber and superior thermal shock resistance

Soluble wool bulk serves as the ideal filler for various types of refractory linings and insulation part, it can be also made in chopped or unchopped, lubricated or unlubricated
